

H9RAQM: Research with Qualitative and Quantitative Methods

Module Code:	H9RAQM
Long Title	Research with Qualitative and Quantitative Methods APPROVED
Title	Research with Qualitative and Quantitative Methods
Module Level:	LEVEL 9
EQF Level:	7
EHEA Level:	Second Cycle
Credits:	10
Module Coordinator:	Leo Casey
Module Author:	Stephanie Roe
Departments:	NCI Learning & Teaching
Specifications of the qualifications and experience required of staff	
Learning Outcomes	
<i>On successful completion of this module the learner will be able to:</i>	
#	Learning Outcome Description
LO1	Identify and explain different traditions, approaches and paradigms in educational research.
LO2	Propose research questions and identify their implications with regard to the choice of research methods and the interpretation of the results obtained.
LO3	Label and assess the characteristics, strengths, and anticipated outcomes of a variety of qualitative research approaches (e.g. phenomenographic, ethnographic, grounded theory, case study, and action research).
LO4	Solve problems of quantitative analysis that involve key concepts of statistical concepts (e.g., distribution, sampling, sum of least squares, significance, H0/H1, alpha/beta error).
LO5	Demonstrate an awareness of the ethical bases of educational research.
Dependencies

H9RAQM: Research with Qualitative and Quantitative Methods

Module Content & Assessment			
Indicative Content			
Introduction • What is research? • Research process and advancement of knowledge • Quantitative, Qualitative, and Mixed Research - Research and ethics			
Developing a research perspective • Understanding the research process • Identifying areas of academic interest and developing an appropriate research perspective • Articulating research questions • Preparing a research proposal			
Research Design and Ethics • Experimental Research • Quasi-Experimental and Single-Case • Non-experimental Quantitative Research • Qualitative Research			
Methods for Research • Qualitative research approaches (e.g. action research, interviews and focus groups, conversation analysis, discourses analysis) • Quantitative research approaches (e.g. aims and hypotheses, reliability and validity, statistics, probability and sampling)			
Measurement • Methods of Data Collection, including Tests, Questionnaires, Interviews, Focus groups, Observation, Existing or Secondary data, Reliability and Validity, Sampling			
Assessment Breakdown			%
Coursework			100.00%
Assessments			
Part Time			
Coursework			
Assessment Type:	Assignment	% of total:	30
Assessment Date:	n/a	Outcome addressed:	1,3,4,5
Non-Marked:	No		
Assessment Description: Learners present a critical analysis of a number of research papers in their area of academic interest, paying particular attention to research methods and any associated ethical concerns.			
Assessment Type:	Assignment	% of total:	10
Assessment Date:	n/a	Outcome addressed:	2
Non-Marked:	No		
Assessment Description: Learners submit a mid-semester short written paper which briefly outlines their proposed research area and the question/s which will be answered. This allows for formative feedback to be provided on the feasibility and suitability of their proposed research project.			
Assessment Type:	Assignment	% of total:	60
Assessment Date:	n/a	Outcome addressed:	1,2,3,4,5
Non-Marked:	No		
Assessment Description: Learners produce a quantitative research report demonstrating use of a range of techniques and approaches to quantitative data collection and analysis: 1. Quantitative Research Report demonstrating use of a range of techniques and approaches used in quantitative data collection and analysis (30%). 2. Analysis of own research study and question from qualitative, quantitative and mixed methods perspectives. Students critically explore the insights gained from taking differing research approaches (qualitative, quantitative or mixed-methods) to their research topic (30%).			
No End of Module Assessment			
No Workplace Assessment			
Reassessment Requirement			
Repeat failed items <i>The student must repeat any item failed</i>			
Reassessment Description Students must pass all components of assessment on the module; a component fail leads to a component repeat.
