H9SSP: Scalable Systems Programming

| Module Code: | | H9SSP | | | | |
|---|------------------------|---|--|--|--|--|
| Long Title | | Scalable Systems Programming APPROVED | | | | |
| Title | | Scalable Systems Programming | | | | |
| Module Level: | | LEVEL 9 | | | | |
| EQF Level: | | 7 | | | | |
| EHEA Level: | | Second Cycle | | | | |
| Credits: | | 5 | | | | |
| Module Coordinator: | | Horacio Gonzalez-Velez | | | | |
| Module Author: | | Margarete Silva | | | | |
| Departments: | | School of Computing | | | | |
| Specifications of the qualifications and experience required of staff | | and/or PhD degree in computer science or cognate discipline. May have industry experience also. | | | | |
| Learning Outcomes | | | | | | |
| On successful co | ompletion of this modu | ıle the learner will be able to: | | | | |
| # | Learning Outcome | Description | | | | |
| LO1 | Demonstrate in-dept | epth knowledge of parallel algorithms on large amounts of data | | | | |
| LO2 | Identify and categoris | y and categorise search techniques including similarity search and search engine technologies. | | | | |
| LO3 | Critically compare ar | itically compare and contrast different data-stream processing and specialised algorithms. | | | | |
| LO4 | Critically analyse mir | ritically analyse mining and clustering algorithms on large multi-dimensional datasets. | | | | |
| LO5 | Develop and implem | evelop and implement efficient programming solutions for problems relating to processing data at scale. | | | | |
| Dependencies | | | | | | |
| Module Recom | mendations | | | | | |
| No recommenda | tions listed | | | | | |
| Co-requisite Mo | odules | | | | | |
| No Co-requisite modules listed | | | | | | |
| Entry requirements | | A level 8 degree or its equivalent in any discipline | | | | |
| | | | | | | |

H9SSP: Scalable Systems Programming

Module Content & Assessment

Indicative Content

MapReduce Extensions

Recursive and workflow systems for MapReduce. Resilient data sets

MapReduce Cost Models

Complexity and cost models for MapReduce with emphasis on communication costs and task networks

Near Neighbour search and Shingling Collaborative filtering and similarity sets. Document shingling and sub-strings

Hashing

Locality-sensitive hashing and distance measures. Additional methods for higher degrees of similarity.

Stream Data Model

Stream sources, stream queries, and processing. Sampling data

Streams Operations

Filtering, counting, combining and estimating.

Stream Processing
Building complex pipelines and models

Link Analysis

PageRank algorithm in its application to search engines. Efficient computation of PageRank. Link Spam. Hubs and authorities

Frequent itemsets

Market-Basket Model, many-to-many relationships. Association rules

A-Priori / Limited Pass Algorithms

Determine stages, sets and items under different monotonicity conditions.

Clusters for Streams and Parallelism

Bucket initialisation and merging. Parallel clustering.

Using Scalable Services

Deploying concurrent stream processing and batch processing pipelines

| Assessment Breakdown | % |
|----------------------|---------|
| Coursework | 100.00% |

Assessments

Full Time

Coursework

Assessment Type: Formative Assessment % of total: Non-Marked **Assessment Date:** n/a Outcome addressed: 1.2.3.4.5

Non-Marked: Yes

Assessment Description:

Formative assessment will be provided on the in-class individual or group activities. Feedback will be provided in written or oral format, or on-line through Moodle. In addition, in class discussions will be undertaken as part of the practical approach to learning.

100 Continuous Assessment % of total: Assessment Type: Assessment Date: n/a Outcome addressed: 1,2,3,4,5

Non-Marked:

Assessment Description:

This practical assessment will evaluate the learners' knowledge and understanding of Scalable Systems Programming, possibly in the context of mining and/or clustering

No End of Module Assessment

No Workplace Assessment

Reassessment Requirement

Coursework Only

This module is reassessed solely on the basis of re-submitted coursework. There is no repeat written examination.

Reassessment Description

Reassessment of this module will be via project
