# **H6CMPTHNK: Computational Thinking**

Module Code:	H6CMPTHNK			
Long Title	putational Thinking APPROVED			
Title	Computational Thinking			
Module Level:	VEL 6			
EQF Level:				
EHEA Level:	t Cycle			
Credits:	5			
Module Coordinator:	FRANCES SHERIDAN			
Module Author:	Patrick Delaney			
Departments:	School of Computing			
Specifications of the qualifications and experience required of staff	Master's degree in computing or cognate discipline. May have industry experience also.			
Learning Outcomes				
On successful completion of this module the learner will be able to:				
# Learning Outcome	Description			
LO1 Create high quality	academic, technical and scientific documents using appropriate tools and technologies			
LO2 Implement appropr	ropriate referencing techniques for both written text and programming code			
LO3 Compose both tech	both technical and non-technical questions in a manner which elicits the required response and information			
LO4 Apply critical thinkin	itical thinking, teamwork, communication and problem solving skills when working as part of a team			
LO5 Analyse personal le peers where appro	se personal learning needs and identify ways in which to resolve those needs in an autonomous fashion, seeking the support of, and providing support to where appropriate			
Dependencies				
Module Recommendations				
No recommendations listed				
Co-requisite Modules				
No Co-requisite modules listed				
Entry requirements				

# **H6CMPTHNK: Computational Thinking**

### **Module Content & Assessment**

### Indicative Content

# Computational Thinking

Define and describe how the computational thinking relates to other ways of thinking

### **Computational Thinking**

Introduce the concepts of computational thinking (i.e., Abstraction, Decomposition, Pattern Recognition, Algorithm Design) and how they can be applied in solving real life

# Critical Thinking

Identifying and challenging assumptions. Recognizing the importance of context. Imagining and exploring alternatives. Developing reflective scepticism. Mnemonic Techniques for studying Innovation Techniques

Effective Questioning
Posing questions to: o Peers o Lecturers o Google o Subject specific Q&A forum

# Professional Development

### **Technical Writing**

Elements of Technical Writing I.e. Clarity, Accuracy, Brevity, Sentence length, Paragraphs and Reader Centricity Writing for different audiences i.e. CV, blogs etc.

Referencing in written academic documents, Referencing for code -How to reuse code, acknowledging authors/others work

### Professional Development

Time Management, i.e., Kaizen Stress Management, i.e., Mental health – Anxiety, depression and so on

### **Professional Development**

Effective Communication, i.e., Presentations, Interviews, one to one and so on Personal Responsibility

Roles within a team and dealing with group dynamics

## **Group Work Technologies**

Project Management

### **Group Work Technologies**

Cloud Services for collaboration

Assessment Breakdown	%	
Coursework	100.00%	

### Assessments

# **Full Time**

Coursework

Assessment Type: Othe % of total: Non-Marked **Assessment Date:** n/a Outcome addressed: 1,2,3,4,5

Non-Marked: Yes

# Assessment Description:

Ongoing feedback on ongoing tutorial activities. Feedback on regular reflection.

Portfolio Assessment Type: % of total: **Assessment Date:** n/a Outcome addressed: 1,2,3,4

Non-Marked: No

# Assessment Description:

A portfolio of evidence demonstrating achievement of each of the first four module learning outcomes. Portfolio evidence should comprise samples from assignments completed in other modules accompanied by feedback and responses to feedback where appropriate

**Assessment Type** Reflective Journal % of total: 50 **Assessment Date:** n/a Outcome addressed: 5

Non-Marked:

# **Assessment Description:**

An ongoing reflective journal documenting the learning experiences of each week and outlining the relevance of each piece of evidence in the learning portfolio

No End of Module Assessment

No Workplace Assessment

# Reassessment Requirement

### Coursework Only

This module is reassessed solely on the basis of re-submitted coursework. There is no repeat written examination.

### Reassessment Description

Reassessment of this module will be via resubmission of the learning portfolio with new evidence supporting the achievement of any outstanding learning outcomes.
