## Programme Outcomes

On successful completion of this programme the learner will be able to :

Description
Demonstrate a critical understanding of the theories, concepts and methods pertaining to the domain of Accounting and Finance along with an understanding of the contemporary Economic and Regulatory environment and their interrelationships in a business context.
Acquire detailed knowledge of many areas relating to the world of Accounting and Finance, developing a deep understanding of Financial and Statistical tools and Standards, along with Taxation and Accounting practices in the context of the relevant legal and regulatory framework and the corresponding Economic environment.
Gather and analyse complex data from multiple sources, including financial statements, economic, regulatory data and/or other sources, identify issues and communicate findings in a clear and comprehensive manner.
Use skills of critical analysis to identify and test hypotheses within the many parameters of a work setting, allowing for independent conclusions to be drawn and effective decision making.
Work effectively to provide critical analysis of real-world scenario's and apply classroom thought tools and concepts.
Apply strong qualitative and quantitative skills to critically analyse real world problems in the domain of Accounting and Finance and propose solutions to such issues.
Work effectively both independently and in diverse team environments, appreciating the requirement to accept responsibility for own work and that of others.
Demonstrate an ability to work independently with the capacity to further develop own learning on a stand-alone basis.
Work effectively both independently and in diverse team environments to achieve and deliver on objectives.
Demonstrate independent insight into issues pertaining to Accounting and Financial markets with the ability to challenge relevant models and applicable regulatory frameworks, where appropriate.
Exercise appropriate judgement in developing their own careers and professional development and be able to present appropriate skills sets to prospective employers.
Experience of, and integration into college – led events through the academic year.
Exercise appropriate judgement in developing academic integrity and integrate this integrity into their personal professional development.
Experience of, and an advanced understanding of the role of reflection in personal professional development and in adapting to the perspectives of different stakeholders in an organisation.
Experience of, working with college – led initiatives to pursue professional development opportunities that may arise.
Learners will have had experience of working in a team within classroom assignments, and will be able to link the skills thus acquired to an academic context.
