

Programme Code	MSCIB	Programme Duration	1				
Programme Level	9]		EQF Level	7	EHEA Level	Second Cycle
Programme Credits	90]					
Semester Duration		1 Week(s)					
CAO Code; QQI Progamme Code etc		Code					
Programme Extra Information		Modules are delivered in block delivery mode on Monday, Wednesday and Friday over a three week period.					

Programme Outcomes On successful completion of this programme the learner will be able to:

Description

demonstrate a systematic knowledge of the role and responsibilities of the key management functions from Marketing, through Human Resources, Technology, Law and Finance and a detailed understanding of how each of these functions relate to each other in the business context;

have the ability to appraise and critique management theory and practice in each of the key business functions;

acquire, interpret and analyse current theories in the various fields of management and demonstrate a critical awareness of the appropriate context for applying this knowledge in a practical manner

analyse the key factors that influence management decisions and critically assess the theoretical and practical models used to support such decisions

identify the many risks facing business in an international context and take responsibility for managing such risks

exhibit a comprehensive knowledge of the economic and legal environment in which the management function operates

Employ advanced conceptual, analytical and practical skills necessary for providing solutions to contemporary management issues in an international context

Apply both quantitative and qualitative skills in order to analyse critical issues in a management context

Source and analyse complex data across all business functions, appreciate the relevance of such information and identify critical elements necessary for adding value to the organisation

Identify and appreciate key management risks and develop and implement strategies and policies for strategic management of such risks

Demonstrate mastery of academic writing skills

apply qualitative and quantitative skills in order to analyse critical management issues and independently make decisions which maximise value to the business organisation

evaluate different strategic projects and independently determine their contribution to the value of the organisation

identify the regulatory and ethical framework in which business operates and demonstrate the ability to make decisions which do not breach this framework

take initiative to develop ideas and develop new theories and arguments without assistance

Appreciate the complexity of the management function in key areas from Marketing, through Human Resources, Technology, Finance, Ethics and Law and make practical contributions to each management function

Take responsibility for providing solutions to complex and ambiguous problems arising in a management context

Articulate clearly rationale for decisions and proposed strategic solutions

Initiate solutions to complex business problems posed, and display leadership in the delivery of proposed solutions

Explore the core relationship between management planning and business performance

continue to use the skills developed to further advance the learner's knowledge of key areas of business

develop the ability to learn independently to further the student's professional development

demonstrate evidence of taking initiative for learning beyond prescribed course work

appreciate the multiple influences on the management discipline and the complexity of the environment in which management operates

demonstrate an ability to view theories and practical situations from multiple perspectives, present arguments and develop solutions to different scenarios.

appreciate the developments and changes facing the business community and demonstrate an ability to devise strategies to minimise risk and maximise value creation.
